Abstract (en)

[origin: WO2006007810A1] The invention relates to a self-service device such as a cash dispenser, a bank statement printer and/or an information or transaction terminal provided with a control panel which comprises several components. Said self-service device comprises a device (7) for monitoring the weight of at least one of the components of the control panel in order to be able to recognise manipulations carried out on the components.
