Abstract (en)

A shoe system for a hoofed animal comprises a shoe (1) having a wear side, which in use faces a surface supporting the animal, and a detachable stud. The system comprises fixing means for fixing the stud to the shoe (1). The fixing means comprising a recess (5) in the wear side and a fixing protrusion on the stud, which is sized and adapted for being received in the recess (5). The fixing means further comprises a pin hole (6a, 6b) in the shoe (1) which is open into said recess (5), and a corresponding pin hole in the fixing protrusion, whereby the stud is lockable relative to the shoe (1) by a locking pin insertable into said pin holes (6a, 6b).
