Abstract (en)
The boat has a transportation container (6), which is detachably fastened at a hull using a retainer (4) and accessible from outside. The retainer forms two supports (36,38) with the hull, where the retainer is locked in a retaining position and in a non active position. A latching hook (26) is hinged at the retainer. A knee lever has levers (32,34) hinged at the hook and the retainer, respectively.

Abstract (de)
Das Unterseeboot weist einen Transportbehälter (6, 6') auf, der lösbar am Schiffskörper (2) befestigt ist und von außen zugänglich ist. Auf diese Weise kann das Ladevolumen des Unterseebootes bedarfsweise vergrößert werden.
