Abstract (en)

The package has a rectangular base (16) on which objects are placed. Lateral walls (3, 5) are normal to the base and contiguous to a front wall (2), turned towards purchasers, with an opening. The front wall has flaps (12-15), where the flaps (12, 14) are articulated on the lateral walls through an axis (Y`Y). The flaps (12, 14) are folded back inwards to the package at 180 degrees around the axis and partially applied on the lateral walls. The flaps (13, 15) are folded along an axis (X`X) and folded back on the front wall. The axes make an angle of 0 to 60 degrees with respect to each other. An independent claim is also included for a precut and repressed blank for making a package.
