Abstract (en)
Clamping profile for the fastening of a side screen to a main screen. The main screen is preferably a screen which may be extended outward from a caravan, camper van or the like with bending arms. Secure fastening of the side screen is effected, in accordance with the invention, by receiving a profile at the free end of the side screen. The profile is provided with a fastening construction having a clamping effect, allowing fastening to the main screen to be effected. Fastening is effected over the entire length of the side screen on the main screen. The clamping profile consists of a resilient portion against which a body may be rotatably pressed. The body may comprise a cylinder, lever and the like.
