Abstract (en)

[origin: US2007009230A1] A list on which contents which can be reproduced and contents which cannot be reproduced under copyright management can be distinguished from each other is produced. A content processing apparatus 10 includes a first source ID list L indicating providing sources of contents whose reproduction is permitted, a content reproduction section for reproducing contents stored in a storage medium, a reproduction permission/inhibition decision section 172 for deciding whether or not each of the contents is reproducible based on a source ID applied to the content and the first source ID list, and a title list production section 512 for producing a list of title information of the contents in such a manner that the title information of those contents which are decided to be non-reproducible by the reproduction permission/inhibition decision section can be distinguished.
