Abstract (en)

[origin: WO2006122818A2] The invention relates to a low-pressure mercury amalgam lamp arrangement comprising an amalgam reservoir and a cladding tube that surrounds the lamp. The lamp is provided with a mechanical contact with the cladding tube in the area of the amalgam reservoir. The invention is characterized in that the lamp is annularly enclosed by a metal strip in the area of the amalgam reservoir. Said metal strip rests against the lamp and represents the mechanical contact with the cladding tube.
