Abstract (en)
The contact pin (1) has a cylindrical pin extension (3) that is connected with a connection head (2), where the free end of the extension is opened or closed. The cylindrical pin extension and the head are formed from a metallic flat material. A flexible tongue (7) is arranged in the connection head and produces a clamping connection with a terminal lead (8). The flexible tongue is formed with a free side opposite to an inner wall of the connection head.
