Abstract (en)
[origin: US2009293174A1] The invention relates to a glove, in particular a pilot's glove, having a lining comprising at least one outer layer made up of several material blanks with a glove outer surface, and the outer layer of the lining has no joining point on at least a volar zone and preferably a distal zone in the finger tip region of one or more glove finger(s). The material blanks comprise at least an inner hand part, a top hand part, several finger side parts and optionally a thumb part, and the inner hand part is joined to the other material blanks along a single continuously extending join line 5 to form the at least one glove finger. The invention further relates to a lining comprising material blanks joined to one another and an intermediate element is stitched into the join formed by a seam.
