Abstract (en)
[origin: WO2006024481A1] The invention relates to an assembly for representing images in three dimensions, comprising: an image reproduction device (1) with a plurality of image elements, which represent information from one or more views of a scene, an object or a text, a filter array (2), which is located in front of the image reproduction device (1) in the line of vision (B) of an observer (6) and which contains a plurality of filter elements (2a) that are transparent in certain wavelength ranges, in addition to filter elements (2b) that are essentially impermeable to visible light, said filter elements (2a, 2b) being mounted on a transparent substrate (3), which is positioned in front of the image reproduction device (1).
