Abstract (en)
[origin: WO2006024063A2] The invention relates to a computer mouse comprising a housing (1) provided with a supporting surface (2) and a generated surface (4) projecting from the supporting surface (2) and tapering away therefrom. The aim of the invention is to create advantageous handling conditions. To this end, the generated surface (4) is embodied in a conical manner with essentially straight generatrices, and has a height of three fingerbreadths, in order to support a thumb (5) on a peripheral side, and an index finger and a middle finger (6, 7) on an opposite peripheral side.
