Abstract (en)

[origin: EP1633178A1] A standard-conformal rear panel has cross-links (CL) (110A-110C) that link directly adjacent flush positions (FP) (102E,102F) in pairs on a subassembly frame. First means of contact (MOC) link to CL contacts in a first FP pair (202A). Second MOC link to CL in a second FP pair (202B). Means of linking (210) link to first and second MOC to create CL between first and second FP.
