Abstract (en)
[origin: EP1785115A2] The system has a set of coupling units (22) arranged at a patient supporting surface, where the units (22) selectively connect another set of coupling units (24) or a third set of coupling units (26) to a supporting column and/or a transporting carriage. The units (22) have a recess (40) with an inner contour (42), and the units (24, 26) are designed as guiding pins that have an outer contour (58) adapted to the inner contour (42). The units (24, 26) have a recess for accommodating the unit (22), where the recess has an inner contour (50) adapted to an outer contour (38) of the units (22).
