Abstract (en)
[origin: EP1785121A2] The table has a column (10) with a base (14) and a head (16), and a patient accommodating area (12), which is connected with the head. The area is swivelable relative to the column around an axis, which is parallel to the accommodating area plane. A curved guide way (42), which is continuous around a curved axis, is provided at the head. A saddle coupled with the area is supported on the guide way so that saddle is adjustable along the guide way by a drive.
