Abstract (en)
The ride has a rotary device, where gondolas (20) for two passengers (A, B) are connected with the rotary device by bars. A position of the passengers is changed by a control device that is operated by the passengers. Each gondola is radially adjusted against a decoration post (30) by using drives operated by the passenger (A). A closure device e.g. water spraying device (22), is provided in each gondola, is operated by the passenger (B) and is arranged on the decoration post.
