Abstract (en)

The pencil has a gripped zone (3) arranged on a circumferential surface of a wooden casing (1), where the casing is provided with a core (2). Ribs (4) are formed integrally with a shrink film (5) by performing a stamping operation on a rear side of the shrink film. The shrink film is pushed over the gripping zone and shrink-fitted under an action of temperature, where the shrink film is made of a plastic. The ribs are formed of water based polymer dispersion and plastic and extends in a longitudinal direction of the pencil.

Abstract (de)

Die Erfindung betrifft einen Gegenstand, insbesondere ein Schreibgerät, mit einer erhabene Strukturen aufweisenden Griffzone, wobei der Gegenstand im Bereich der Griffzone (3) mit einer Folie (6) beschichtet ist, auf deren Oberfläche die erhabenen Strukturen vorhanden sind.
