Abstract (en)
A collapsible container that may be configured in a collapsed condition or an erected condition, includes a base (102), a pair of side walls (104) and a pair of side walls (106) that are pivotally attached to the base. The walls (104,106) are arranged to lie substantially parallel with the base (102) when collapsed and to stand substantially perpendicular to the base when erected. The free edges of the erected walls define an open mouth. A pair of stacking elements (116) are located adjacent to the free edges of the end walls (106) for supporting the base of another container stacked on the first container. The end walls (106) lie adjacent the base (102) and side walls (104) overlie the end walls when collapsed.
