Abstract (en)

[origin: EP1785375A1] A sheet article feeding apparatus includes a suction belt (26) which transports a sheet article (1), a first suction portion (22) which sucks the sheet article (1) onto the suction belt (26), at least one second suction portion (23) provided on a downstream side of the first suction portion (22) in a transporting direction, at least one position detecting portion (31-34) which detects a position of the sheet article (1) that is being transported, and a control portion which controls the first suction portion (22) and the second suction portion (23) based on a result of detection of the position detecting portion (31-34).
