Abstract (en)

An interface device, particularly for shower cubicles (2) or whirlpool baths comprising a unit (3) for controlling and setting their operating cycle. The device comprises at least one sensor (6) for detecting a preset position of the user and at least one first button (10) and one second button (11), which can be activated by the at least one sensor (6). The at least one first and second buttons (10, 11) can be operated selectively by the user for the remote programming of the unit.
