Abstract (en)

[origin: EP1785540A2] Device consists of installation pot, installation flange and protection hood (12). The fire protection element (20') is integrated or inserted into a body (13) that is designed in the protection hood. The body, which is inserted or designed in the protection hood lies opposite to the drain tube of the installation pot, has a cover plate (14). The cover plate partially covers fire protection element opposite the drain tube of the installation pot.
