Abstract (en)

[origin: EP1785541A2] Standpipe (13) has pipe clamp assembly (23) which is formed by a constricted section of the standpipe. The length, measured in longitudinal direction of standpipe of the constricted section corresponds to or is marginally larger than the axial length of the pipe clamp (21) which is to be retained in the pipe clamp assembly by clamp retainer. An independent claim is also included for the roof drainage line arrangement.
