Abstract (en)
[origin: EP1785551A2] The tool has a hand lever (26) at whose axial ends a handhold (32) and a coupling unit (30) are provided, and another coupling unit (28) connected to the lever via a rod (34) such that the units bifurcate the tool. The units are fastened at cross-beams of respective scaffoldings (16, 18). The scaffoldings are pushed apart or impinge on one another when force is applied at the handhold during assembling and dismantling the scaffoldings.
