Abstract (en)
[origin: EP1785558A1] Lock (1) comprises a bolt driving element (8) having a blocking element which positions the bolt driving element in the closing position of the lock. Preferred Features: The blocking element is a loop spring (22) with locking protrusions (23) which interact in locking recesses (26) formed in the lock housing in the locking position of the lock. The blocking element has a center ring (27). The bolt driving element has a stop for plate holders (5).
