Abstract (en)

[origin: EP1785565A2] The fitting device (1) has an internal control lever area (22) with a guide way (23), which is determined with the progress of the flap movement and a fixed guidance part (25) is arranged at the fitting part on the side of the corpus. The supporting element (29) is held by the spring action against the supporting portion (28) of the internal control lever area. The load moment exercised by the internal control lever area on the supporting element and the support moment exercised by the supporting element on the internal control lever area change during swiveling of the flap (2) for automatic holding of the flap.
