Abstract (en)
The flood barrier has an inner wall and an outer wall (2), with an elastic seal (13) between them as an inflatable tube. A further wedge-shaped elastic seal (14.17) is in a corner between the walls, pressed outwards by the seal. A guide profile (10.1-10.5) holds the main seal in place, and the wedge seals have a slit (14.1) for a guide pin (15) for positioning.
