Abstract (en)
[origin: EP1785665A1] A light module (6c) for an operating theater comprises at least one white light (10a) and many colored lights (10b,10c) to illuminate the operating area and a light control (15). Power values for the lights can be stored and the control can regulate individual lights in the group. Preferably there are ideal values for light intensity, color temperature and light distribution and preferably the power values are stored in an EEPROM.
