Abstract (en)  
The system has a set of seats (2, 2a, 2b, 2c) concatenated in a row (4) and including respective display devices (10, 10a, 10b, 10c), which are controlled by an operating device. Each seat has a detachable master unit (6) for receiving, subsequent processing and transmission of control signals which are delivered by the operating device, to the display devices of the seats. Each display device has a computer to receive, process and transfer control signals which are delivered by the master unit to the display devices of the adjacent seats. An independent claim is also included for a method for initializing a system of electronically controlled numbering of seats, which are concatenated in a row.
