Abstract (en)
[origin: EP1786010A1] The switchgear has two circuit breaker poles arranged on a support frame. Two earth switches are driven by a rod. Each switch has rotatable contact arms (21, 22), whose axis of rotation is aligned perpendicular to a main expansion direction of the support frame. The contact arms arranged at the ends of the frame are rotatable by the rod in directions opposite to each other towards the frame.
