Abstract (en)

[origin: WO2006030110A1] The invention concerns a cover for a multi-tank spray system (21, 22) provided with a fluid supply system and comprising a cover body (1) provided with fixing means (12) for releasably closing a tank (21, 22). Two channels (20, 30) of fluid passage are provided, a first passage channel (20) for a member pressurizing (2) the tank (21, 22), a second channel (30) for a safety valve (3) integral with the lid cover (1). A third channel (40) for supplying spraying means (5, 50) through a feeding connection (4) can also be integral with the body of the cover (1), said channel may also be located on the lower part of the tank. At least one pressurizing member (2) and the safety valve (3) are removably fixed to the cover body (1) thereby facilitating maintenance and replacement of parts.
