Abstract (en)

[origin: US2008163558A1] A grinding disc, comprising a particularly metal grinding disc base body and abrasive grains applied to a surface of the grinding disc base body, in particular, made from cubic boron nitride is disclosed. The abrasive grains are arranged on the surface of the grinding disc base body with a defined position and defined separation to each other. A greater number of abrasive grains are arranged in given macro regions (18) of the surface of the grinding disc base body than in other given macro regions (19) of the surface.
