Abstract (en)
[origin: WO2006017602A1] An automated packaging system has a plurality of dunnage dispensing stations that can dispense dunnage and a transport network for conveying containers to and from at least two dispensing stations for dunnage to be placed therein. At least one loading station upstream of a dispensing station articles are placed in the containers for shipping. Optionally, an intermediate void determination station determines how much dunnage to dispense.
