Abstract (en)

[origin: WO2006008058A1] The invention relates to a device for heating fastening means, e.g. anchoring rods and reinforcing iron. Said device comprises a heatable receiving part (10) that is provided with a space (11) for receiving the fastening means (20). The receiving part (10) contains heat-storing and thermally conductive material (12) that can be heated by supplying energy.
