Abstract (en)
[origin: WO2006022564A1] In an installation for cleaning of exhaust gas containing filters, following an inlet of the installation are located a filtering system collecting soot and solid impurities, a catalyst reactor (25, 35) and a filter (24, 34) collecting dust and fine impurities, through which diesel engine exhaust gases are transmitted. The filtering system collecting soot and solid impurities contains a ceramic filter (23, 33) with a chemically active cartridge bounding chemical compounds including calcium oxide CaO.
