Abstract (en)

The table has a table top overlying on a plate carrying unit (1) and movable relative to the rack between a forward usage final position and a retreated position. A safety device is integrated into a slider and exhibits a damper (9), which is attached with the slider. The damper exhibits a tappet (11), which engages a certain stretch in front of the usage position with a stopper (12) during shifting of the top into the usage position.
