Abstract (en)

[origin: EP1787549A1] A sitting cushion with improved comfort, of the type comprising, enclosed in a cover (11), at least one airtight hermetic container (17) made of flexible material, which contains at least one layer (13) made of open-cell polymeric foam, and at least one element (14) made of an expanded polymer, such as sponge rubber or the like. The expanded-polymer element (14) forms a sitting portion (15) which has, at the ischiopubic and sacral region of a user, a compartment (16) for at least one, selectively, among an additional hermetic container (112, 212) which contains a layer of polymeric foam (113), an expanded polymer padding (19), or a combination thereof.
