Abstract (en)

[origin: EP1787561A1] The vacuum cleaner filter bag (1) comprising an inlet opening (3), a retaining plate (4), which is situated on the exterior of the bag in the vicinity of the inlet opening and can be attached to a retaining device on a vacuum cleaner in order to fix the vacuum cleaner filter bag. The inlet opening is sealed in the first position of the sealing device (2) and is open in the second position of the latter. A sealing device situated in the vicinity of the inlet opening, which is configured in such a way that it adopts a first position when the retaining plate is not attached to the retaining device and a second position by the attachment of the retaining plate to the retaining device. An independent claim is included for vacuum cleaner for receiving of vacuum cleaner filter bag.
