Abstract (en)

[origin: EP1788071A1] The present invention relates to a method for producing uni-core detergent particles capable of producing uni-core detergent particles containing an anionic surfactant in a high yield, wherein the uni-core detergent particles are generally very low in skin irritability, and favorable in biodegradability, and inhibited in the particle growth, and have a sharp particle size distribution, without necessitating a drying step for removing the water after the granulation step.
