Abstract (en)
The bearing (2) has two bearing parts (5, 6), and a control plate rotatably connected with the bearing parts. The control plate is narrowed along a guide (9) and is movable relative to the bearing parts. The guide has a curved shape and as a connecting link. A rotatable sliding unit is provided in the guide and is connected with the control plate. The sliding unit has two parallel contact surfaces, which rests against inner walls of the guide. An independent claim is also included for a window or door comprising a bearing.
