Abstract (en)
Framework arrangement (100) has a connecting device (152,153) and connecting device of support-part (151) extends in connected condition by the frame-connecting-unit (140) into one of the pre-chambers (112,114) of the framework (110). The profiles section is held at the limiting or partition walls of the pre-chamber in such a manner that a direct tension-proof connection is created between the frame and the support-part. An independent claim is included for method for fixing a plate shaped frame-connecting-unit to the frame hollow section.
