Abstract (en)

[origin: EP1788305A1] Combustion chamber components has a combustion chamber confining combustion chamber housing (12) and a igniter retainer projection (20) at a wall (14) of the combustion chamber housing. A porous evaporator medium (24) is provided at the igniter retainer projection. A fuel supply pipe (28) for feeding liquid fuel into the porous evaporator medium leads into igniter retainer projection. Combustion chamber components has an air inlet (38) in the igniter retainer projection in a area lined by the porous evaporator medium and an air passage opening (40) is provided in the porous evaporator medium.
