Abstract (en)

The device has telescopic extensions that are arranged at a distance from each other. Each extension has a fixed part (4) arranged in a household device and another part (5) that is movable relative to the fixed part. The movable parts are connected with a cross connection (6) using a spring unit (7) that is formed as a part of clip-connection. The spring unit is made from a plane sheet metal through deformation and is arranged on both end regions of the cross connection. An independent claim is also included for an oven e.g. cooking oven, with a pull-out device.

Abstract (de)

Die Erfindung betrifft einen Auszugsvorrichtung für ein Haushaltsgerät, insbesondere einen Back- oder Bratofen, wobei mindestens zwei im Abstand zueinander angeordnete Teleskopauszüge (2, 3) mit jeweils einem ortsfest in der Ofenmuffel angeordneten (4) und einem relativ zu der Ofenmuffel translatorisch beweglichen (5) Teil vorgesehen sind und die beiden beweglichen Teile (5) der Teleskopauszüge (2, 3) mit mindestens einer Querverbindung (6) mittels eines Federelements (7) miteinander verbunden sind.
