Abstract (en)

[origin: EP1788531A2] The device has a barcode reader group (8) reading an identification label (9) of a suitcase or package (4) and a label receipt (10) possessed by a passenger (3). The group activates elements which permit the passage of the passenger and the suitcase or package through an exit door (7) and a safety detector arch, respectively, when the bar codes of the label and receipt are the same. The suitcase or package is disposed on a conveyor belt (5) that is ordered to advance by the group.
