Abstract (en)
[origin: WO2006029869A1] Disclosed is an impact power measuring device (4) comprising several measuring chambers (24) which are provided in an elastic material (24) and are disposed and configured such that an impact that is to be measured and hits at least one of the measuring chambers (24) modifies the volume thereof. Said device (4) further comprises a discharge tube (8) that is connected to the measuring chambers (24) and a sensor (12) which is positioned in said discharge tube (8). The inventive impact power measuring device (4) is characterized in that additional chambers (30) are provided which are not connected to the discharge tube (8) encompassing the sensor (12).
