Abstract (en)
[origin: WO2006029832A1] The invention relates to a smoker's booth (1) which is equipped for suctioning off tobacco fumes (1a) or similar and comprises a suction zone (3) that is covered by a cover element (2) as well as at least one entrance zone (9). In order to ensure great suction power while allowing all of the tobacco fumes (1a) to be suctioned off from the suction zone (3) if possible, at least one preferably linear suction device (4) is provided, said suction device (4) is disposed above the entrance zone (9), and a driving jet device is provided for generating a driving jet (10).
