Abstract (en)

[origin: WO2006029693A1] The invention relates to a method for preventing serum formation during the storage of paste-type preparations by preventing the separation of packed stable paste-type preparations. According to said invention, said packaging is exposed to a gas prior to or during a filling operation, wherein said gas is at least partly is absorbed by said preparation. The thus available forms of the product, which is problemlessly stored without appearance of separation, are also disclosed.
