Abstract (en)
[origin: WO2006027072A1] The invention relates to a connecting piece (1) used to fill and empty a container, particularly a bag provided with an inner area enabling the inside of the container to be connected to the outlet (3) of the connecting piece, wherein a cover (4) is fixed on the outlet of the connecting piece in order to close said outlet. The cover is detachably fixed to the connecting piece. When the cover is detachably fixed, the connecting piece can only be opened by the destruction thereof, particularly through turning it, tearing it off, tearing it open or folding it.
