Abstract (en)

[origin: WO2006029626A1] The present invention relates to a dispensing device (1) for a dispensing system to be used in connection with a dispensing of a beverage, said system comprising a beverage container (2), said container (2) comprising an outlet wherein an extractor tube (15) is arranged, a pressure medium, such as CO₂, which is adapted to force the beverage via the extractor tube out of the container, a cooling device adapted to cool the beverage in the container. The dispensing device (1) further comprises temperature control means (10), which is adapted to disconnect dispensing of the beverage when the temperature of the beverage exceeds a predetermined value.
