Abstract (en)

[origin: WO2006029692A1] The invention concerns a utility mixing valve, equipped with an electronic display device (1) for displaying water temperature and flow rate, and a control unit for controlling said display device (1), as well as a method for operating such a display device. Said display device (1) has at least one lighting means (2), consisting of a number of lighting elements (4) capable of being individually excited based on the water flow and whereof the colour may vary according to the water temperature.
