Abstract (en)
[origin: WO2006029705A1] The invention relates to a brake disc assembly (1) for vehicle wheels, comprising at least one friction ring (2, 3) and a wheel fixing zone (7) that runs parallel to the friction ring (2, 3). Said friction ring (2, 3) and wheel fixing zone (7) are configured in one-piece from a die-cast material and connecting struts (6) are formed between the friction ring (2, 3) and the wheel fixing zone. Said assembly is characterised in that the connecting struts (6) are elastically sprung in a radial and axial direction.
