Abstract (en)

[origin: WO2006029800A1] The invention relates to a key which comprises at least one three-dimensional body and which is made of at least two different materials, a key system with a carrier which can be allocated an individual code, a method for the identification of an individual key wherein the structural dimensions are stored in the form of data, and to a method for the production of a key wherein a three-dimensional body is formed from at least two different materials, wherein the at least two materials are arranged in a disordered physical distribution and are extensively distributed in phase separation in relation to each other.
